PROFESSIONAL EXPERIENCE

Silicon Valley Bank / Tata Consultancy Services   San Francisco, CA
UI Developer   *July 2022 - Present*
- Build internal web application enhancements using React, Typescript and NodeJS
- Use MobX store to efficiently manage application data from the front-end
- Convert front-end and back-end data during loopback using Express middleware
- Unit test front-end and middleware using react-testing-library and Jest for complete code coverage
- Work on 10 or more story points in JIRA tickets each sprint as well as participate in weekly refinement sessions

Wells Fargo Digital / Tata Consultancy Services   San Francisco, CA
UI Developer   *February 2022 - July 2022*
- Built open source web applications for mobile and desktop devices with React and Redux
- Wrote unit tests using react-testing- library with the goal of reaching 100% code coverage for every component developed
- Automated Behavior Driven Development tests using Cucumber
- Implemented various accessibility features to best meet ADA guidelines
- Participated in application demos to show progress made in development and answered any questions the product owners may have

Wells Fargo Corporate / Tata Consultancy Services   Danbury, CT
UI Developer   *June 2020 - February 2022*
- Developed front end applications using ReactJS using both functional and class components
- Stored front-end data that can be reused throughout the application using Redux
- Managed server data using Axios middleware to be used with React applications
- Migrated legacy applications into newer projects with ReactJS to allow for more sustainable enhancements and efficient performance
- Conducted code reviews for team members to minimize bugs and ensure proper coding standards
- Provided knowledge transfer sessions to new team members and helped with on-boarding new developers into projects

GE Global Research / Tata Consultancy Services   Niskayuna, NY
Software Developer/Application Support   *November 2018 - June 2020*
- Built web applications using Angular, Java Spring-boot and Hibernate using Agile development practices
- Developed code to meet industry standards as well as maintain proper structure and compatible with various web browsers
